TYAGARAYANAGAR
MADRAS - 17

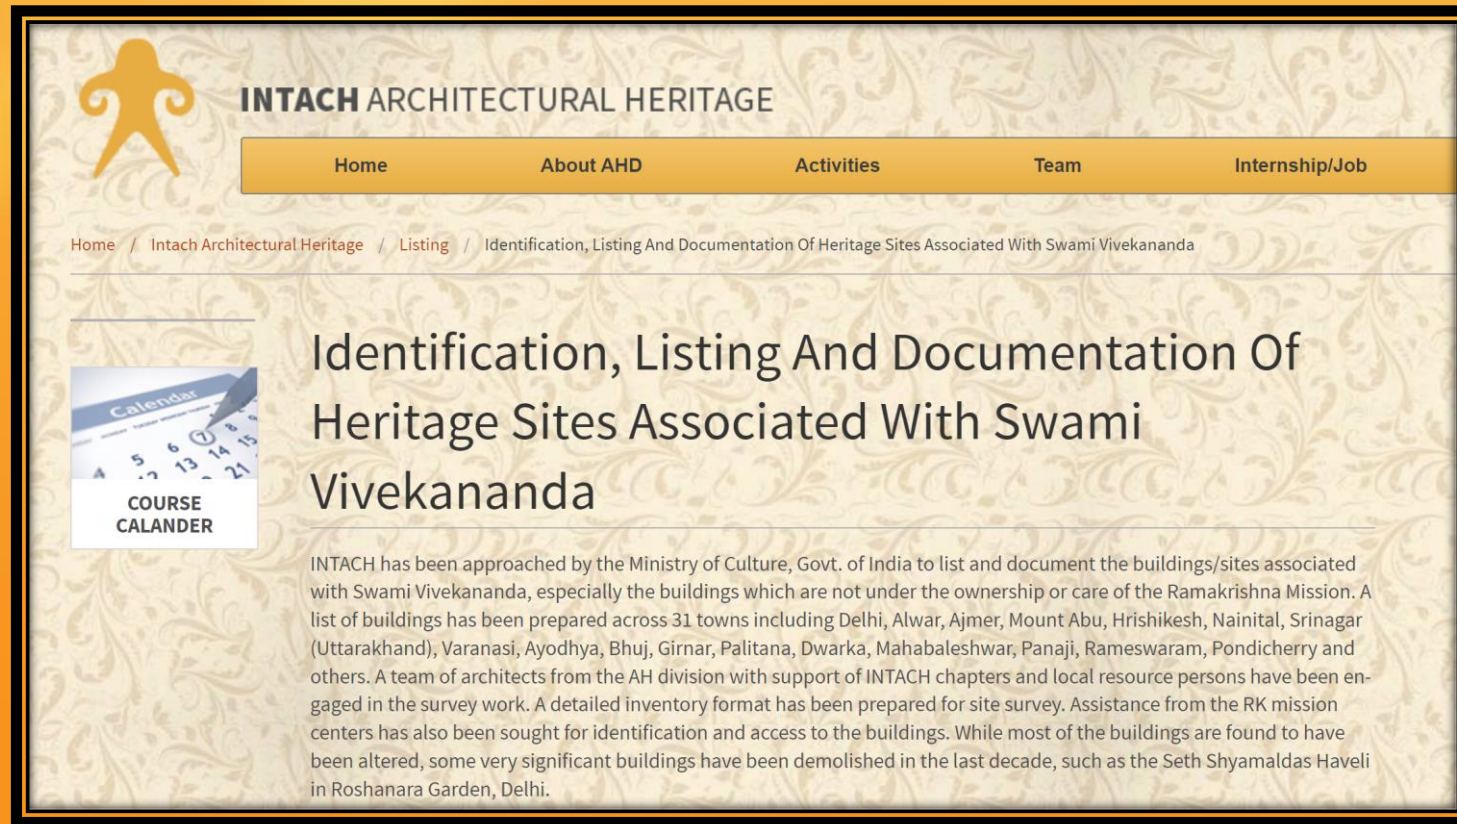

Swami Vivekananda saved Hinduism
and saved India. But for him we would
have lost our religion and would not have
gained our freedom. We therefore owe
everything to Swami Vivekananda. May his
faith, his courage and his wisdom ever
inspire us so that we may keep safe the
treasures we have received from him!

C. Rajagopalachari

Govt Interventions

Documenting the buildings/sites associated with Swami Vivekananda (INTACH Indian National Trust for Art and Cultural Heritage) with directions from Ministry of Culture, Govt of India

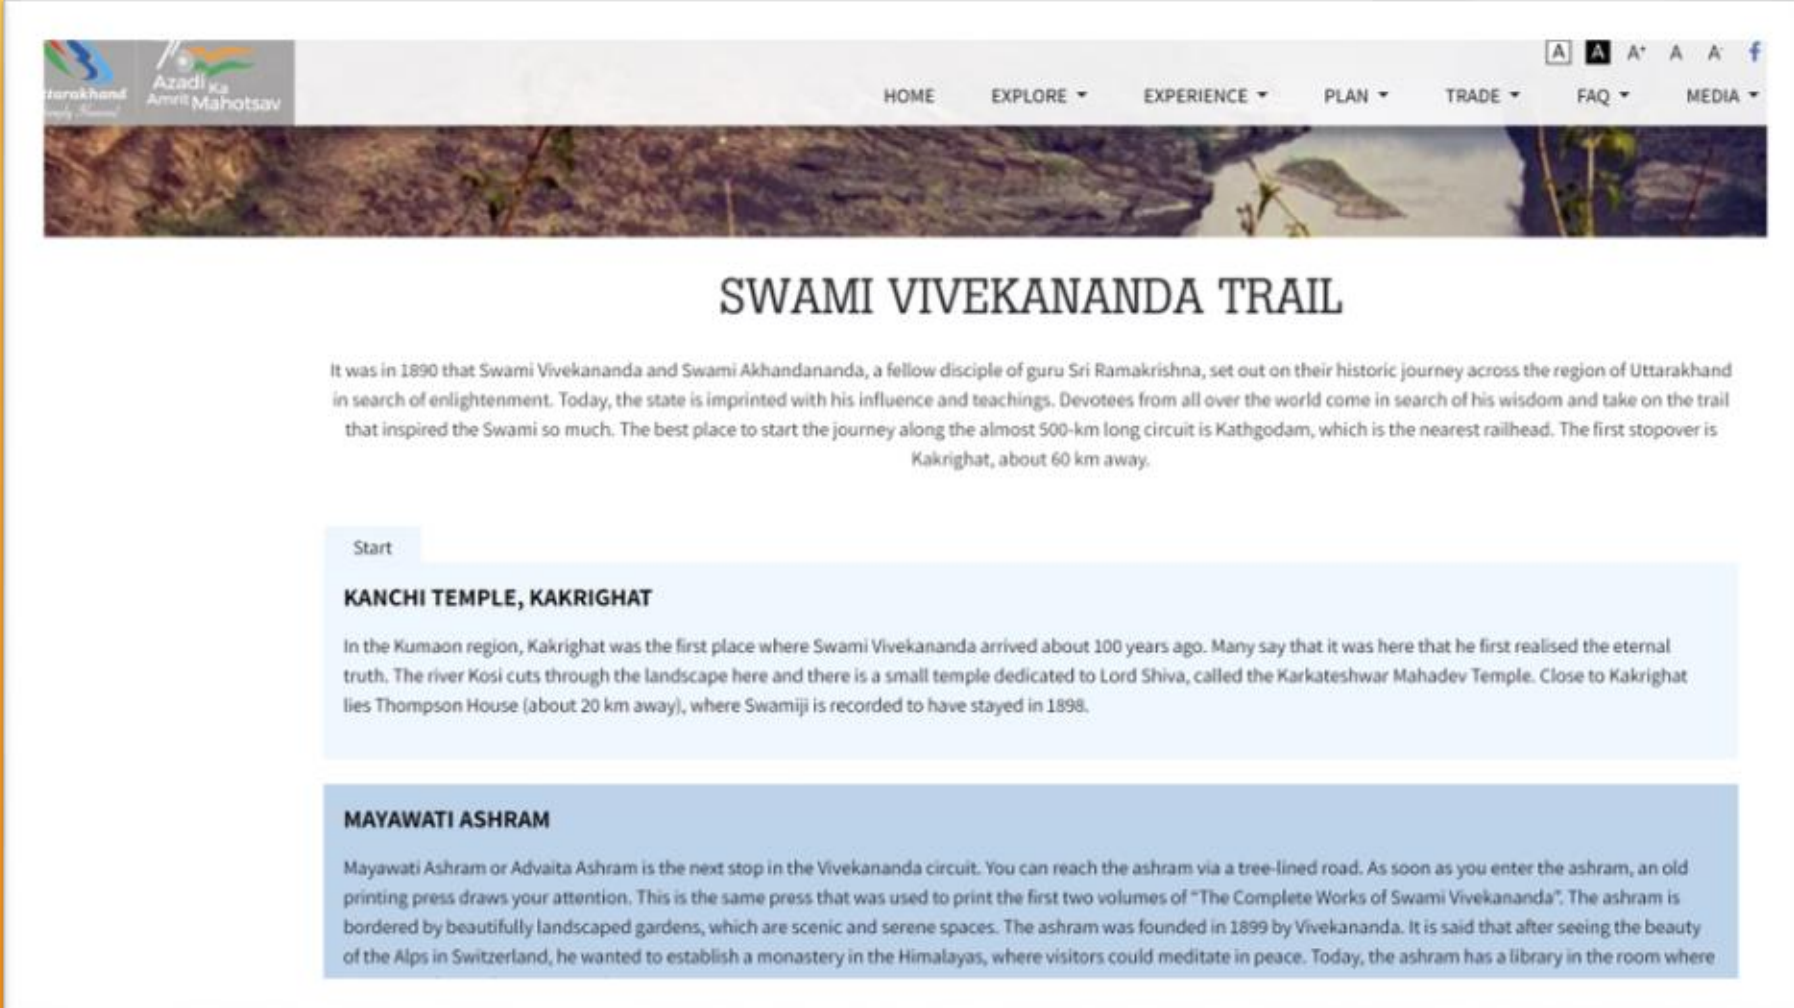

Source: <http://architecturalheritage.intach.org/?p=317>

Documenting the buildings/sites associated with Swami Vivekananda

- INTACH (Indian National Trust for Art and Cultural Heritage) has been approached by the Ministry of Culture, Govt. of India to list and document the buildings/sites associated with Swami Vivekananda, especially the buildings which are not under the ownership or care of the Ramakrishna Mission.
- A list of buildings has been prepared across 31 towns including Delhi, Alwar, Ajmer, Mount Abu, Hrishikesh, Nainital, Srinagar (Uttarakhand), Varanasi, Ayodhya, Bhuj, Girnar, Palitana, Dwarka, Mahabaleshwar, Panaji, Rameswaram, Pondicherry and others.
- A team of architects from the AH division with support of INTACH chapters and local resource persons have been engaged in the survey work. A detailed inventory format has been prepared for site survey.
- Assistance from the RK mission centers has also been sought for identification and access to the buildings.

Vivekananda Heritage Trails/Tours from Govt(s) of Uttarakhand and Gujarat

The screenshot shows the website of Uttarakhand Tourism. The header includes the Uttarakhand logo, the 'Azadi Ka Amrit Mahotsav' banner, and a navigation menu with links: HOME, EXPLORE, EXPERIENCE, PLAN, TRADE, FAQ, and MEDIA. Below the header is a scenic image of a river flowing through a forest. The main heading is 'SWAMI VIVEKANANDA TRAIL'. The introductory text describes the historic journey of Swami Vivekananda and Swami Akhandananda in 1890, mentioning their search for enlightenment and the 500-km trail starting from Kathgodam. The page lists two stops: 'KANCHI TEMPLE, KAKRIGHAT' and 'MAYAWATI ASHRAM', each with a brief description of its significance and location.

SWAMI VIVEKANANDA TRAIL

It was in 1890 that Swami Vivekananda and Swami Akhandananda, a fellow disciple of guru Sri Ramakrishna, set out on their historic journey across the region of Uttarakhand in search of enlightenment. Today, the state is imprinted with his influence and teachings. Devotees from all over the world come in search of his wisdom and take on the trail that inspired the Swami so much. The best place to start the journey along the almost 500-km long circuit is Kathgodam, which is the nearest railhead. The first stopover is Kakrighat, about 60 km away.

Start

KANCHI TEMPLE, KAKRIGHAT

In the Kumaon region, Kakrighat was the first place where Swami Vivekananda arrived about 100 years ago. Many say that it was here that he first realised the eternal truth. The river Kosi cuts through the landscape here and there is a small temple dedicated to Lord Shiva, called the Karkateshwar Mahadev Temple. Close to Kakrighat lies Thompson House (about 20 km away), where Swamiji is recorded to have stayed in 1898.

MAYAWATI ASHRAM

Mayawati Ashram or Advaita Ashram is the next stop in the Vivekananda circuit. You can reach the ashram via a tree-lined road. As soon as you enter the ashram, an old printing press draws your attention. This is the same press that was used to print the first two volumes of "The Complete Works of Swami Vivekananda". The ashram is bordered by beautifully landscaped gardens, which are scenic and serene spaces. The ashram was founded in 1899 by Vivekananda. It is said that after seeing the beauty of the Alps in Switzerland, he wanted to establish a monastery in the Himalayas, where visitors could meditate in peace. Today, the ashram has a library in the room where

Call for Proposals from Dept of Science & Technology, Govt of India under SHRI Scheme

Science and Heritage Research Initiative (SHRI)

Call for Proposals

India is one of the oldest civilisations that is rich in heritage and traditional knowledge systems in diversified areas. The Science and Heritage Research Initiative (SHRI) of the Department of Science and Technology (DST) intends to utilise modern tools and techniques of Science & Technology for preserving, protecting and presenting Indian heritage on the global platform using a multidisciplinary approach.

The proposals are invited in the following areas:

- i. **Conservation Engineering:** tools, techniques, equipment and new material development etc
- ii. **3D Digitization of Heritage Sites/Practices:** virtual, augmented, metaverse & mixed reality and gigapixel image technologies etc
- iii. **Geospatial Mapping:** cultural infrastructure development and heritage management
- iv. **Risk Assessment:** diagnosis, monitoring, and survey of heritage sites in earthquake prone zones etc
- v. **Documentation of Folklore and Culture:** traditional dance forms, folk/classical music, musical instruments, medicinal practices, ancient rituals and traditions etc.
- vi. **Development of Heritage Clusters:** Integrated socio-economic revival of heritage practices by creating backward & forward linkages for sustainability.
- vii. **Centre of Excellence:** Centre of Excellence for cultural heritage protection and research

Archives – Evolve from 2D to 3D Digitization

Digitization of Heritage artifacts and sites associated with Swami Vivekananda – 2D→3D scanning

- Majority of the digitization of heritage artifacts (objects associated with Swami Vivekananda) and sites (indoor/outdoor spaces) related to Swami Vivekananda at Ramakrishna Math & Mission are in 2D format and these are primarily done with photographic/video cameras
- But if these could be scanned in 3D, it could provide a safeguard against potential loss or damage to these invaluable sites/materials due to natural disasters, vandalism, or other unforeseen events (geopolitical crisis)
- The reason a 3D scan would be better is that the 2D photos (or) drawings cannot match the accuracy of a 3D scan. By creating detailed digital 3D replicas, we ensure the preservation and re-creation of the heritage artifacts and sites.

Inspiration for 3D Scanning

Watch BBC Short Video - 3D Scanning in Ukraine
